

My self Akhil ,I have 5.5 years of work experience in the front end web development,in that 4.5 years of relevant experience in react js,and I worked on multiple projects like automation tracker, e commerce application and Workforce management software application.

I have used TechStack like :HTML5, CSS3, JavaScript, TypeScript, ReactJS, Redux Tool Kit, Bootstrap4,Material UI, NodeJS, ExpressJS, MongoDB. React Router, TailwindCSS and unit testing libraries like JEST, React-Testing-Library.....,figma, adbode xd,

NodeJS(in nodejs I have experience like 2 years of experience and I worked on few concepts like building ApiEndpoints, Authentication with JWT, API Integrations),

Coming to my role I working as a senior ui developer. and Coming to my responsibilities or day to day activities are like

1.i spent most of the time on the development part 2.and i implemented responsive and reusable components 3.also i written unit test cases using jest, sometime fixing bugs 4.and also i'm coordinating with backend team for API integration

These things I worked on and This is a brief introduction about me
